Structures

Overall, the population in this region resides in structures that are vulnerable to earthquake shaking, though resistant structures exist. The predominant vulnerable building types are informal (metal, timber, GI etc.) and unknown/miscellaneous types construction.

Historical Earthquakes

Date (UTC)	Dist. (km)	Mag.	Max MMI(#)	Shaking Deaths
1973-08-16	395	6.4	IX(20k)	1

1995-07-11	362	6.8	IX(3k)	11

Recent earthquakes in this area have caused secondary hazards such as landslides that might have contributed to losses.
